What is a firefighter storage container?

Portable storage containers are ideal structures for fire departments to conduct firefighter training. Shipping containers are highly versatile and customizable, allowing fire departments to stack storage units on top of one another to create any number of unique building designs.

Can you use shipping containers to build custom firefighter training structures?

Here's a few benefits in using shipping containers to build custom firefighter training structures. Using shipping containers for firefighter training is probably the most cost-efficient option there is. Used shipping containers are low-cost to purchase and can be modified in any way the fire department sees fit.

What types of fire training can a shipping container support?

Most shipping containers can support various types of fire training, such as digital, gas-fueled, or carbonaceous fires. This can allow fire departments to train in a variety of different ways or skill-levels using the same shipping container structure.

Why did the fire department use a shipping container complex?

The fire department wanted to use a shipping container complex, as these facilities allow firefighters to better train in real-life scenarios with the necessary safety guards in place.

Design mobile or roll-off fire training containers that can be deployed to remote training areas or shared between fire departments.

Whether you're powering a music festival or keeping a rural school lit, the 120kW mobile energy storage power station isn't just a tool--it's a game-changer.
