The 16 series BMS is widely used in lithium iron phosphate batteries for their efficient power balancing, over-discharge, over current, and short circuit protection.

Built-in 150A BMS, with RS485, RS232, CAN interface. Uses Grade A cells, with high safety, 6000+ cycles life, large current charge ...

The JK BMS 16S 48V 200A is a sophisticated battery management system designed for lithium battery packs, offering comprehensive protection and monitoring capabilities.

Each battery pack requires a BMS to monitor the voltage of the battery pack and increase the service life of the battery pack. Provide protection ...

It is an intelligent protection board scheme specially designed for 16 series battery packs of start-up battery and electric energy storage products. It is ...

How does your BMS look at battery data? A:

This design is optimized for applications requiring up to 16 series-connected cells (57.8V nominal), offering comprehensive battery pack management ...

EK-LFP-16S-60A-1BB-1-TI1 is an 16-cells battery pack designed in series for battery protection solution by EBAK, Which use for the application on ...

EK-LFP-16S-60A-1BB-1-TI1 is an 16-cells battery pack designed in series for battery protection solution by EBAK, Which use for the application on LiFePO4 base battery packs.

Built-in 150A BMS, with RS485, RS232, CAN interface. Uses Grade A cells, with high safety, 6000+ cycles life, large current charge and discharge capability, high temperature ...

Each battery pack requires a BMS to monitor the voltage of the battery pack and increase the service life of the battery pack. Provide protection against overcharge/over discharge/over ...

This design is optimized for applications requiring up to 16 series-connected cells (57.8V nominal), offering comprehensive battery pack management with 100A switching capability, ...

With just one enclosure and 16 battery cells, you can effortlessly create your own 48V battery pack, making it an ideal choice for DIY enthusiasts and hobbyists.

It is an intelligent protection board scheme specially designed for 16 series battery packs of start-up battery and electric energy storage products. It is suitable for lithium batteries with different ...

This smart BMS supports up to 16S (16 series cells), making it ideal for 48V lithium-ion and LiFePO4 batteries used in solar energy systems. It ensures optimal charge and discharge ...

The JK BMS 16S 48V 200A is a sophisticated battery management system designed for lithium battery packs, offering comprehensive protection and ...
