---

This marks another record year for PV deployment, despite continued overcapacity in manufacturing and falling module prices that placed pressure on the entire value chain.

The report examines the capacity and market value of the PV modules market, categorized by technology for both historical (2020-2024) and forecast (2025-2030) periods.

China Chamber of Commerce for Import and Export of Machinery and Electronic Products (CCCME) released its analysis of ...

With this edition of the quarterly briefing, we've included sections on import and export trade dynamics and manufacturer's financial conditions. This research will help clients ...

As PV modules are the central component of the industry, this analysis reviews market conditions that affect solar panel pricing and availability and makes reasonable ...

InfoLink Consulting says Chinese solar PV manufacturers exported 3% less solar PV module capacity on a year-over-year (YoY) basis in H1 2025, totaling 127.3 GW versus ...

As PV modules are the central component of the industry, this analysis reviews market conditions that affect solar panel pricing and ...

This marks another record year for PV deployment, despite continued overcapacity in manufacturing and falling module prices that placed ...

In conclusion, China's solar module exports in 2025 tell a story of adaptation and enduring strength. Despite internal and external pressures to manage oversupply, the industry ...

In July 2025, the top five single-country importers of Chinese modules were, in order, the Netherlands, Saudi Arabia, the Philippines, Brazil, and Greece, together accounting ...

The impact of China's PV development surge on module prices was muted by the persistence of oversupply conditions and poor economics for module manufacturers.

Global solar module supply chain manufacturing capacity has expanded enormously over 2024, and continues to grow in 2025, despite the 50% year-on-year (yoY) solar module price ...

China Chamber of Commerce for Import and Export of Machinery and Electronic Products (CCCME) released its analysis of China's photovoltaic (PV) product foreign trade in ...
