---

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, ...

Located in Kern County, California, the Bellefield project is split into two phases, each with up to 500MW of solar and 500MW of 4-hour duration battery storage (2,000MWh). ...

This ambitious 2,000 MW initiative, developed under a long-term contract with Amazon, consists of two phases, each incorporating 500 MW of solar power alongside an ...

Tesla continues to cement its position as a major force in grid-scale energy storage, with a new \$500 million battery energy storage system (BESS) set to come online in ...

The project, planned across four sites, intends to construct a 500MWac solar power plant, complemented by up to 500MW of Battery Energy Storage System (BESS) capacity.

Matrix Renewables has signed a Full EPC (Engineering, Procurement, and Construction) agreement with Tesla for the design, construction, and commissioning of a 500 ...

Recently, Spanish renewable energy developer Matrix Renewables announced that it has signed a full-cycle Engineering, Procurement, and Construction (EPC) agreement with ...

The California Energy Commission has issued its final permit for the Willow Rock Energy Storage Center, a first-of-its-kind energy storage system capable of discharging at full ...

Hydrostor secures key permit for 500 MW, 8-hour California energy storage facility The installation would be the Canadian company's first grid-scale deployment of its "advanced" ...

Bellefield is a two-phase project, with each phase including 500 MW of solar and 500 MW of four-hour battery-based energy storage, for a total of 2,000 MW of installed capacity.
