China unveils the world's first military-grade mobile 5G base station, developed by China Mobile Communications Group and the PLA, designed for battlefield use to enable ...

A new class of private 5G base stations, such as the Intel and Trenton Systems' IES.5G, enables advanced high-performance computing capabilities in a nearly plug-and-play ...

Using 5G network low latency features to provide end-to-end data transmission services, 5G low latency is conducive to real-time control of rescue robots and rescue UAVs during emergency ...

Recently, Frontline Communications began installing Starlink's satellite internet service, which provides mobile command units with uninterrupted connectivity, even in the ...

This paper proposes a 5G emergency communication coverage solution based on fixed-wing VAVs, which achieves network formation through the UAV airborne 5G integrated base ...

For emergency services organizations on the frontlines, secure wireless connectivity is a lifeline. You rely on fast and always-on access to apps and data to perform your mission, whether in a ...

We extended a 4G/5G testbed comprising terrestrial mobile cells that are connected via satellite with edge communication capabilities. We propose a Core-Edge Split ...

This article describes how 5G technology can be deployed to provide highly secure, private 5G tactical networks for Mission Critical Communication, and some of the technologies ...

The arrival of 5G networks promises to revolutionize mission-critical communications for public safety
