Can you install a battery as a solar system in California?

California has long led the nation in incentivizing the installation of clean energy technology. With SGIP, homeowners in Calif. can install a battery as part of their home solar system at little to no additional cost, depending on your qualifications.

Are solar energy storage cabinets compatible?

For those investing in renewable energy, particularly solar power, the compatibility of solar energy storage cabinets is a key consideration. These systems are designed to store surplus energy generated by solar panels during the day for use when sunlight is unavailable, such as at night or during cloudy periods.

Can a battery be used as a home solar system?

With SGIP, homeowners in Calif. can install a battery as part of their home solar system at little to no additional cost, depending on your qualifications. Combining your SGIP savings with the 30% federal investment tax credit (ITC) can cut your solar-plus-storage costs in half.

Do I need solar panels to qualify for the SGIP battery rebate?

No, you do not need to have or buy solar panels to qualify for the SGIP battery rebate. However, there are substantial benefits to pairing solar panels with battery storage. See how much solar panels cost in your area. Zero Upfront Cost. Best Price Guaranteed.
