-----

GOGLA is the global association for the off-grid solar energy industry, representing over 200 members working to transform lives through clean, affordable, and high-quality solar ...

Sub-Saharan Africa, home to 80% of the global population without electricity access, is unlikely to reach the United Nations" goal of ...

Operating with a small in-built solar panel, connected to a battery and using an LED light bulb, it can transform how rural communities see the world. Its use in places without ...

By the end of 2024, 29 African countries had installed over 1 MWp of solar capacity, signifying a broader reach for solar energy across the continent. South Africa ...

Most future greenhouse gas emissions will come from China, India and Africa. Their mix of energy sources will decide the climate"s ...

Made up of 54 countries, Africa gets more sunshine hours than any other continent. It has some of the highest levels of solar ...

Solar technology offers scalable and adaptable solutions, from household solar kits to community mini-grids, capable of transforming rural energy landscapes (UN, 2024). The ...

In response, off-grid energy solutions are emerging as a game-changing alternative. Solar home systems, mini-grids, and pay-as ...

Solar energy is revolutionizing rural development across Africa, offering transformative solutions for communities struggling with ...

By the end of 2024, 29 African countries had installed over 1 MWp of solar capacity, signifying a broader reach for solar energy across ...

Solar energy is revolutionizing rural development across Africa, offering transformative solutions for communities struggling with energy poverty. By introducing ...

Operating with a small in-built solar panel, connected to a battery and using an LED light bulb, it can transform how rural ...

In response, off-grid energy solutions are emerging as a game-changing alternative. Solar home systems, mini-grids, and pay-as-you-go (PAYG) models are providing ...

Today, solar has become cheap and versatile enough to help bring affordable, reliable power to millions -- creating a win-win for lives and livelihoods as well as the climate.

Most future greenhouse gas emissions will come from China, India and Africa. Their mix of energy sources will decide the climate's future as much as the Europe and the ...

Sub-Saharan Africa, home to 80% of the global population without electricity access, is unlikely to reach the United Nations' goal of access to affordable, reliable, ...
