Compressed-air energy storage, a decades-old but rarely deployed technology that can store massive amounts of energy underground, could soon see a modern rebirth in ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

The project involves the construction of three 350 MW compressed air energy storage generator units, totaling 4,200 MWh, complemented by an underground cavern with ...

Hydrostor secured a \$200 million USD investment from Canada Growth Fund (CGF), Goldman Sachs Alternatives, and CPP Investments to advance its Advanced ...

The transaction will support Hydrostor's continued investment in Advanced Compressed Air Energy Storage (A-CAES) projects in Canada and around the world. The transaction ...

Hydrostor has secured US\$55 million in funding from Export Development Canada (EDC) to advance its 1,600MWh A-CAES project in Australia.

The 60 MW/600 MWh storage project is co-located with a 250 MW photovoltaic plant allowing for a high level of green energy self sufficiency.

The California Energy Commission has issued its final permit for the Willow Rock Energy Storage Center, a first-of-its-kind energy storage system capable of discharging at full ...

The A-CAES technology integrates compressed air, purpose-built hard-rock caverns, and water with proven components from traditional mining and gas operations to ...

The new \$200M investment will support Hydrostor's 500 MW / 4,000 MWh Advanced Compressed Air Energy Storage (CAES) project in Ontario's Lennox and Addington ...
