What balancing services does the Dutch Bess project use?

Dutch BESS projects mainly participate in two balancing services: Frequency Containment Reserve (FCR) and automatic Frequency Restoration Reserve (aFRR). The Dutch TSO, TenneT, uses these services as the primary and secondary restoration services, respectively, as explained in RaboResearch's report on the Dutch electricity sector.

Is the regulatory environment a major hurdle for Bess developers?

However, the regulatory environment is a major hurdle for Dutch BESS developers. The most significant challenge are the notoriously high grid costs, which are expected to rise further. In contrast, Germany's grid-fee exemption is accelerating BESS deployment there.

Is the Dutch Bess market a good investment?

The Dutch BESS market offers strong potential amid rising flexibility needs, but faces grid and policy hurdles. Still, investor interest and regulatory innovation grow.
