-----  
What is an arc flash jacket?

Arc Flash Jacket designed to interface with Arc Flash Hood. An electrical arc flash is more severe with higher voltages & higher fault level ratings of the equipment (switchgear) substation. The greater the flash, the greater the severity of the radiation exposed to the operator.

What are arc flash suits?

Arc Flash Suits are designed to provide protection from arc flash heat exposures. Arc flash suits are designed to protect the electrical technician from heat and to reduce or minimize total burn injury. This helps to provide the user with extra seconds of protection to help escape possible secondary explosions or fires in the work area.

What is an electrical arc flash?

An electrical arc flash is a condition that is created with the sudden release of electrical energy. An electrical arc flash originates from a breakdown in the insulation medium.

Should electrical technicians wear arc flash suits?

Electrical technicians, by law should always wear and be properly trained in the safe use and application of Arc Flash suits and appropriate personal protective equipment such as insulated rescue sticks for the possible electrical hazard with which they may face.
