What arc flash mitigation solutions do you offer?

We offer a variety of arc flash mitigation solutions, such as switchgear, software, and circuit breakers, for both passive and active arc flash protection. Our systems comply with the National Fire Protection Association (NFPA) 70E: standard for electrical safety in the workplace. Need help?

What is an arc flash?

An arc flash is an electrical accident that creates a high-temperature explosion. It can vaporize surrounding metal, set fires, and result in severe burns. Although rare, arc flashes can have grave consequences so you need to ensure your people and site are always protected.

Why is the switchgear industry important in Indonesia?

The Switchgear industry in Indonesia presents several key considerations for potential stakeholders. Understanding the regulatory environment is crucial, as the government emphasizes compliance with local standards and international norms.

What causes an arc flash?

An arc flash can happen during abnormal use due to a corruption of isolation, or in circumstances involving animals, flooding, vibrations, or corrosion. Yet, it can also occur during commissioning or maintenance, rendering equipment unusable and forcing costly downtime with serious economic consequences.
