Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Armenia imports 81% of its primary energy supply and 100% of its fossil and nuclear fuels. These imports stem mainly from Russia and to a lesser extent also from Iran. Expansion in cross ...

If you've ever wondered how renewable energy systems maintain grid stability while juggling solar panels, wind turbines, and battery banks, meet the unsung hero: the ...

These may include introducing transitional frameworks that offer some predictability to existing investors and operators, as well as opening the door for potential subsidies or incentives tied ...

Armenia's ambitious Gyumri EK lithium battery energy storage project represents a \$48 million leap toward energy independence. Slated for completion in Q3 2025, this 120 MWh facility will ...

It serves as a rechargeable battery system capable of storing large amounts of energy generated from renewable sources like wind or solar power, as well as from the grid during low-demand ...

China-based rolling stock manufacturer CRRC has launched a 5 MWh battery storage system that uses liquid cooling for thermal management.

To address Armenia's electricity system challenges, two main options are currently discussed: the expansion of transmission capacity with Iran and Georgia to export surplus solar energy, as ...

The world's largest rolling stock manufacturer says that its new container storage system uses LFP cells with a 3.2 V/314 Ah ...

The world's largest rolling stock manufacturer says that its new container storage system uses LFP cells with a 3.2 V/314 Ah capacity. The system also features a DC voltage ...

China-based rolling stock manufacturer CRRC has launched a 5 MWh battery storage system that uses liquid cooling for thermal ...
