---

Edify Energy said the 185 MW / 370 MWh Koorangie battery energy storage system in northwest Victoria has started exporting to the ...

This project will enhance renewable energy integration in Australia. The Woolooga BESS project has a total energy storage ...

According to the Clean Energy Council, Australia saw a record-breaking year for large-scale battery storage in 2023, with projects under construction significantly up compared ...

The collaboration was formalized at the Australia Wind Energy Conference in Melbourne and represents the first initiative of its kind in the country. The partnership sets the ...

Edify Energy said the 185 MW / 370 MWh Koorangie battery energy storage system in northwest Victoria has started exporting to the grid with hold point testing now ...

The project, named Portland Energy Park, represents an investment of A\$1.3 billion (approximately US\$860 million) and will become Australia's largest grid-scale battery ...

Discover five energy storage projects revolutionizing Australia's energy landscape. Learn about innovative technologies, impressive capacity.

Australia's clean energy transition accelerates as the Capacity Investment Scheme secures 4.13 GW of new large-scale battery projects, boosting grid stability and sustainability.

"The Wooreen Energy Storage System is the largest single project investment made by EnergyAustralia.
