What is energy in Austria?

Energy in Austria describes energy and electricity production, consumption and import in Austria. Austria is very reliant on hydro as an energy source, supported by imported oil and natural gas supplies. It is planned by 2030 to become 100% electricity supplied by renewable sources, primarily hydro, wind and solar. [citation needed]

Why are electricity bills rising in Austria?

Electricity bills in Austria break down into three core parts: Government interventions like the "Strompreisbremse" (price brake) and waived renewable surcharges in 2023-2024 helped cushion customers from global energy price shocks. However, rising network fees in 2025 (+20-30% in some regions) are nudging bills upward again.

Prognos compared international industrial electricity prices for the Austrian electricity industry. Based on this analysis, we also developed recommendations for government instruments to ...
