The DBS5900 is a wireless access device for the eLTE wireless broadband private network solution. It provides wireless access functions, including air interface management, access ...

The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme of wireless communications. They are ...

The BCF is implemented as a discrete unit or even incorporated in a TRX in compact base stations. The BCF provides an operations and maintenance (O& M) connection to the network ...

A base transceiver station (BTS) or a baseband unit (BBU) is a piece of equipment that facilitates wireless communication between user equipment (UE) and a network. UEs are devices like mobile phones (handsets), WLL phones, computers with wireless Internet connectivity, or antennas mounted on buildings or telecommunication towers. The network can be that of any of the wireless communication technologies like GSM, CDMA, wireless local loop, Wi-Fi, WiMAX or other

Find reliable communication distribution boxes for efficient cable management. Durable, high-performance solutions for telecom and data centers. Shop now!

Designed to house a variety of communications equipment, customers take advantage of our engineering and factory integration for complete turn-key solutions. The ...

In order to ensure the continuity and efficiency of communication services, the power system of telecommunications base stations needs to have high reliability, stability and high efficiency to ...

Command Center and Distribution Modules (2500 Series) A code-compliant two-way communication system
