---

Reliance Power on Monday signed a long-term power purchase agreement (PPA) with Green Digital to jointly develop a 500 megawatt (MW) solar power plant in Bhutan. Green ...

Scheduled for completion within 24 months, the solar power project is expected to be operational by May 2027. It will play a crucial role in expanding Bhutan's solar energy ...

Developed by the Bhutan Energy Research and Development Center (BERDC) with support from the International Solar Alliance (ISA), ...

Bhutan's authorities are seeking a developer to design, supply, install, test and commission a 120 MW solar farm. The deadline for applications is Jan. 26, 2026.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Nearly all of Bhutan's electricity comes from its glacier-fed hydropower plants. In a first major step towards diversifying its energy mix, the Himalayan Kingdom initiated a 180-kW ...

This project will be Bhutan's first and largest grid-connected utility-scale solar power plant, marking a significant leap in the country's renewable energy ...

Punakha--After months of delays caused by incessant rain and prolonged monsoon, Phase II of Bhutan's first utility-scale solar power plant in Yongtru, Sephu Gewog, is ...

This project will be Bhutan's first and largest grid-connected utility-scale solar power plant, marking a significant leap in the country's renewable energy ambitions.

In a significant step towards diversifying its energy sources, Bhutan is poised to launch its first utility-scale solar power plant, the Sephu Solar Project, by early 2025.

Developed by the Bhutan Energy Research and Development Center (BERDC) with support from the International Solar Alliance (ISA), the roadmap focuses on deploying ...

Discover how innovative idle outdoor power supply systems are transforming energy access in Thimphu""s challenging terrains while supporting Bhutan""s sustainability goals.
