In an innovative stride towards sustainable energy solutions, Vattenfall, a leading Swedish energy company, has launched a groundbreaking trial for bidirectional charging in Sweden.

The technology enables charging the batteries of electric vehicles and transferring the stored energy back to the stationary storage system in the building or to the grid when ...

Volkswagen, in collaboration with HagerEnergy GmbH, has embarked on an innovative bidirectional charging pilot project in Sweden, aiming to revolutionize the way power is ...

The technology enables charging the batteries of electric vehicles and transferring the stored energy back to the stationary storage ...

The objective of this article is to propose a photovoltaic (PV) power and energy storage system with bidirectional power flow control and hybrid charging strategies.

ELECTRIC CARS AS ROLLING CHARGING STATIONS: In the "ROLLEN" research project, Fraunhofer IFAM and its partners have shown how electric vehicles with bi-directional ...

Traditional hydropower reservoirs can't keep up with the erratic output from wind farms dotting the Baltic coast. That's where modular storage containers enter the picture. These steel-clad units, ...

The Bidirectional Charging project, which began in May 2019, aimed to develop an intelligent bidirectional charging management system and associated EV components to ...

Using real-life demonstrations, the study will explore the practical application of bidirectional charging and

highlight its potential benefits, such as peak shaving, providing ancillary services ...

The case study focuses on rural distribution grids in Southern Germany, projecting the repercussions of different charging scenarios by 2040. Besides a Vehicle-to-Grid scenario, ...

Volkswagen, in collaboration with HagerEnergy GmbH, has embarked on an innovative bidirectional charging pilot project in Sweden, aiming to ...

In Ahmad et al. (2024), a parking lot with integrated photovoltaic energy generation and energy storage systems (PV-ES PLs) is proposed to facilitate EVs charging, ...
