Can a professional electrician fix a blown fuse in Your House?

Fixing a blown fuse in your house can be a dangerous affair. A professional electrician can fix your electric issues and bring light back to your home safely. McCarrick Electric has provided Colorado residents with reliable electrical services and advice for over 40 years. We can help you figure out what to do when you blow a fuse in your house.

What happens if a fuse blows?

Fire hazards, broken equipment, and lost power are some possible consequences of a blown fuse. When a fuse blows, your options are: Ensure you have a new fuse with the same breaking capacity, type, amperage, and rating. Following electrical safety practices are also an essential part of learning how to replace a blown fuse.

What happens if you blow a fuse or tripping a breaker?

Blowing a fuse or tripping a circuit breaker is a common issue, especially if you're a multitasker. If you overload a circuit, your system will cut off the electrical flow to prevent your wires from overheating and causing circuit damage or fire. Follow these steps to restore power and get all those appliances going again:

Can a blown fuse cause a fire hazard?

A blown fuse can happen due to overloaded circuits, faulty appliances, or short circuits. While replacing a fuse is a simple fix, using the wrong type or size can create a fire hazard. The good news? You can safely replace a fuse yourself with the right precautions, or you can call an electrician if you're unsure.
