Is Cambodia ready to lead Southeast Asia's green transition?

With a clear target of 7% solar by 2025, progressive policy shifts, and strong financial innovation, the Kingdom is proving that it's ready to lead the way in Southeast Asia's green transition. Cambodia's solar energy capacity is set to hit 530.14 MW in 2025, making up 7% of national power supply--up from 3.2% in 2023.

Why is Cambodia building new energy plant projects?

The government is boosting building new energy plant projects to generate clean energy for the grid, said Keo Rattanak, Minister of Mines and Energy. The projects will increase Cambodia's share of clean energy generation capacity to 70 percent by 2030 from more than 62 percent at present, Rattanak said.

Can Cambodia push for a greener energy future?

"Cambodia has an opportunity to push for a greener energy future by requesting investment specifically in clean technologies like solar, battery storage, and closed-loop systems of pumped storage hydropower," she said. So far, large-scale solar farm development has moved slowly in light of the country's immense amount of untapped shine.

What is the future of solar energy in Cambodia?

The future of solar energy in Cambodia looks promising. With continued investment and support from the government and international partners, the country is well-positioned to achieve its renewable energy targets.
