Do you need an off-grid solar system in Canberra?

One of the biggest advantages of having an off-grid solar system in Canberra, ACT is reduced energy costs, as rural consumers are often asked by utility providers to pay excessive grid connection fees. If your building can't connect to the local power grid, an off-grid system is exactly what you need.

Can you use a grid-tie inverter for an off-grid solar PV system?

You can't use a grid-tie inverter for an off-grid solar PV system. It can easily damage the whole system and here is why. Grid tied inverters have a control device to match the inverter cycles with the utility grid cycles. They need to be in phase, otherwise the voltages will cancel each other out.

What is a solar off grid inverter?

Solar off grid inverter also gives the owner an option to monitor the functionality of the whole system. Besides, inverters can act as power output maximizers: they track the voltage of panels and identify the optimum operational power for the whole array. How is an off-grid inverter different from a grid-tied inverter?

Should I buy an off grid inverter?

When purchasing an off grid inverter, you have to make sure it suits the size of your solar panel system. For example, if your solar panel array has a combined power of 5kW then a 5,000 W inverter should be just right for it. Consult with the manufacturer when in doubt and read the guidelines.

Our solar kit is an affordable price compared to other options on the Australian market today. Rest assured your investment will last you and prove to be a reliable source of clean energy for ...

They convert DC power from the solar panels into AC power for use in homes or businesses without a connection to the grid. Off-grid only inverters are essential for standalone solar ...
