With thousands of energy storage sites already in place across the State, this exciting technology is playing an important role in making sure New York ...

Chemical reactions differ from physical changes, which include changes of state, such as ice melting to water and water evaporating to vapor. If a physical change occurs, the physical ...

The 79 MW project in Hauppauge and the 50 MW facility in Shoreham, both in New York's Suffolk County, will provide the utility with ...

The Long Island Power Authority approved two utility-scale battery energy storage contracts on Wednesday, Dec. 18 -- a 50 ...

Plans were announced to transform the site of the old Arthur Kill Power Station on Staten Island into the city's largest battery storage ...

This infrastructure will help support New York City's electric grid and progress the clean energy transition, the company says. "The Arthur Kill re-development project will install ...

Cooking, fermentation, glass making, and metallurgy are all chemical processes that date from the beginnings of civilization. Today, vinyl, Teflon, liquid crystals, ...

The Long Island Power Authority approved two utility-scale battery energy storage contracts on Wednesday, Dec. 18 -- a 50-megawatt project on LIPA's property that had ...

Chemical formula, any of several kinds of expressions of the composition or structure of chemical

compounds. The forms commonly encountered are empirical, molecular, ...

A chemical element is any substance that cannot be decomposed into simpler substances by ordinary chemical processes. Elements are the fundamental materials of which ...

Located in Lewiston, NY, 4.5 miles downstream from Niagara Falls, the Niagara Power Project uses a gated tunnel under the City of Niagara to divert water from the Niagara River into two ...

Elevate is a wholly owned subsidiary of a fund managed by ArcLight. Once completed, the project will be the largest battery storage ...

The chemical characteristics of elements are intimately related to the number and arrangement of electrons in their atoms. Thus, elements are completely distinguishable from ...

All the matter in the universe is composed of the atoms of more than 100 different chemical elements, which are found both in pure form and combined in chemical compounds.

The new Shoreham facility, known as "KCE NY 31," will connect to the existing Shoreham Substation and provide 200 megawatt-hours of energy storage with a four-hour ...

Chemical bonding - Covalent, Molecules, Atoms: When none of the elements in a compound is a metal, no atoms in the compound have an ionization energy low enough for ...
