-----

As the world's largest solar manufacturer, China's policy changes are causing international module prices to rise, exacerbating ...

Finally, by integrating the cost factors into assessment framework, we estimated the cost of solar power supply in each grid, ranked them in ascending order on price, and ...

China is transitioning to a market-driven framework for solar energy pricing, with the change set to take effect by June 1, 2025. The National Energy Administration (NEA) has ...

Prices for solar goods could face fresh pressure, however, as the country rolls out a new market-based pricing mechanism for renewable sources of power, Wang warned.

China recently announced its decision to transition its renewable energy sector from an FIT-based to a market-based pricing ...

China is transitioning to a market-driven framework for solar energy pricing, with the change set to take effect by June 1, 2025. The ...

This policy promotes the full market-based determination of on-grid electricity prices for new energy sources, including ground-mounted and distributed PV projects, as well ...

Looking ahead in the Free-on-Board (FOB) China market, prevailing bearish conditions are expected to prevent any immediate price increases in modules. However, ...

China recently announced its decision to transition its renewable energy sector from an FIT-based to a

market-based pricing mechanism from June 1, 2025.

The costs of wind and solar power generation in China have dropped significantly compared to early development stages, now ranging between 0.2 yuan (about 3 U.S. cents) ...

As the world's largest solar manufacturer, China's policy changes are causing international module prices to rise, exacerbating ongoing trade and tariff disputes.

The government's stance is clear: China's solar sector, once a symbol of industrial policy success, now faces pressure to shift from rapid expansion to quality-focused consolidation.

The government's stance is clear: China's solar sector, once a symbol of industrial policy success, now faces pressure to shift from rapid ...

The analysis reveals that three converging factors -- polysilicon consolidation, supply-side production cuts, and the cancellation of China's 13% VAT export rebate -- will ...
