Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found ...

In November, solar power inverters in the US and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing ...

Rogue communication devices that were not in official product documents were found inside Chinese solar power inverters when they were examined by U.S. experts for ...

A growing wave of concern has emerged in the United States after American cybersecurity experts discovered hidden cellular ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden ...

The issue of Chinese solar inverters is just a small part of a larger mosaic of technological and geopolitical competition.

Recent revelations concerning Chinese-manufactured solar power inverters have raised significant security concerns following the discovery of potentially harmful ...

Unfortunately, undocumented communication devices have been recovered in a multitude of different Chinese-manufactured batteries ...

China stops connecting inverters to the grid at foreign solar container communication stations

Rogue communication devices that were not in official product documents were found inside Chinese solar power inverters when they ...

We were alarmed by recent reports indicating that Communist China has already compromised the integrity of power inverters connecting to our power grid. These inverters ...

A growing wave of concern has emerged in the United States after American cybersecurity experts discovered hidden cellular communication components embedded in ...

Over the past nine months, unexplained communication equipment has been found inside Chinese power inverters used to connect solar panels and wind turbines to electricity grids.

Unfortunately, undocumented communication devices have been recovered in a multitude of different Chinese-manufactured batteries and solar power inverters that bypass ...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy ...
