Wind and solar installations in Latin America have been on a dramatic growth trajectory. Small-scale solar build in Brazil has driven the market to quintuple over the past five ...

In this context, South American countries are developing sustainable actions/strategies linked to implementing solar photovoltaic (PV) and concentrated solar power ...

This agreement will ensure a steady supply of solar energy even during nighttime hours, with the potential of feeding any surplus energy produced into the national grid.

The operation of hydropower plants in Central and South America is not without its challenges, particularly when confronted with natural phenomena like El Niño.

In-depth news coverage of Latin America's booming renewable energy sector, from large-scale solar PV and wind projects to hydrogen production and grid storage. Track ...

Today we look at the grids of Chile, Brazil, and Colombia, all of which have already made solar a cornerstone of their generation or are working to do so in the near future.

As a result, this systematic review presents the progress, new trends, and the road to a sustainable paradigm with disruptive innovations like artificial intelligence, robots, and ...

This report is an updated and segmented version of our previous South America solar PV outlooks, offering clients a deeper understanding of the factors influencing solar ...

Discover how Latin American countries such as Chile, Argentina and Mexico are leading the development of

Clean solar energy for power plants in South America
