-----

We, the colored people of Pittsburgh, and citizens of these United States, view the country in which we live as our only true and proper home.

Colored and coloured are both English terms. Colored is predominantly used in ?? American (US) English (en-US) while coloured is predominantly used in ?? British English (used in UK/AU/NZ) ...

In this study, we address these critical issues by selectively applying microscale inverted-pyramidal-structured polydimethylsiloxane to the TSC. As a result, we develop ...

Onyx Solar offers a wide range of color options for photovoltaic glass, from white, polar gray, and blue to earthy tones like sand, terracotta, marble ...

**COLORED** definition: having color. See examples of colored used in a sentence.

Crystalline silicon solar cells are connected together and then laminated under toughened or heat strengthened, high transmittance glass to produce reliable, weather resistant photovoltaic ...

colored adjective (APPEARANCE) Add to word list having or producing a color or colors : colored lights / pencils

Colored (or coloured) is a racial descriptor historically used in the United States during the Jim Crow era to refer to an African American. In many places, it may be considered a slur.

Definition of colored adjective in Oxford Advanced Learner's Dictionary. Meaning, pronunciation, picture, example sentences, grammar, usage notes, synonyms and more.

In this study, high-efficiency colored crystalline silicon (c-Si) PV modules prepared by screen printing the front glass with preferred pearlescent pigments are developed.

Onyx Solar offers a wide range of color options for photovoltaic glass, from white, polar gray, and blue to earthy tones like sand, terracotta, marble brown, and even corten steel. These are just ...

Here, we propose an effective chemical treatment method for removing nanoscale surface damage from c-Si microholes. A large neutral-color c-Si TPV after the chemical treatment exhibits ...

What's the difference between colored and coloured? Learn when to use each based on British or American English, with examples, a grammar quiz, and tips.

Utilize blue, green, gray and bronze Vitro performance-tinted glasses to realize vibrant designs that complement and harmonize with solar cell ...

This study demonstrates the development of transparent crystalline silicon (c-Si) solar cells that exhibit vivid colors, enhanced PCE, and long-term stability.

Crystalline Silicon glass is made up of 158.75 x 158.75mm c-Si solar cells. Although these cells are inherently opaque, they can be spaced apart to varying degrees, allowing for adjustable ...
