The Norwegian Minister of Energy officially opened the Northern Lights CO₂ transport and storage facility in Øygarden, near Bergen, Norway. The Northern Lights facility is ...

Summary: Bergen's push toward renewable energy integration makes containerized energy storage systems a game-changer. This article explores how modular battery solutions address ...

While not as dominant as hydroelectric storage, battery energy storage systems (BESS) are gaining traction in Norway for shorter-term storage and grid services.

Norwegian researchers have demonstrated an ingenious underwater energy storage system that uses the immense pressure of the ...

Bergen, Norway | December 18, 2025 - Nereida Energy has secured its first commercial contract, marking a major milestone for the company with the delivery of advanced ...

Is the Bergen Energy Storage Project Under Construction? As of July 2024, preparatory work has begun at the Øygarden site near Bergen, including geological surveys and road upgrades. ...

The Northern Lights CO₂ transport and storage facility, in Øygarden, near Bergen, Norway, was officially opened on 26 September. ...

The facility, a joint venture grouping oil giants Equinor of Norway, Anglo-Dutch Shell and TotalEnergies of France, is expected to bury its first CO₂ deliveries in 2025.

This article explores how battery storage solutions address Bergen's energy challenges, their applications
