For a 20kW solar system, you'll only require 1 - 2 inverters depending on the installation design and your location. You'll have to choose between one 20,000W inverter or two 10,000W inverters. The inverter size should always be as close to the size of your commercial solar system as possible. However, you should consider your location before settling... See more on [gosolarquotes](#) 5/5
