How many solar panels does a Dutch House need?

The number of solar panels needed for your home also depends on a few factors, including: The average home installation falls between 10 to 12 solar panels, which would partially power the average Dutch house with solar energy. Solar panels can cover your entire roof in the Netherlands, depending on your energy needs.

Why is the Dutch government losing money on solar panels?

Because solar panels have become an extremely popular investment, the Dutch government is losing money by compensating everyone who sells their energy into the grid. Originally, the Netherlands was going to shift to the terugleververgoeding policy in 2031, after salderingsregeling ended.

Can I buy solar panels without paying VAT?

Currently, there is no more VAT on solar panels, which means you can buy solar panels without having to pay any extra taxes on top of the initial purchase costs. The netting scheme (salderingsregeling) is an arrangement where you can earn money for the excess energy your solar panels generate.

The simple answer is that it will cost around EUR5000 (for six solar panels) and EUR12,000 (for 18 solar panels), including an inverter and installation, but excluding VAT.

For a roof with 10 solar panels, you pay EUR 4408 to EUR 5714 on average in 2025, which you earn back within 4 to 6 years. What your exact investment and payback period are, ...
