---

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in the country's renewable energy journey.

Croatia now has over 26,000 solar plants connected to the grid, totaling 872.1 MW, putting it on track to surpass 1 GW this year. Current capacity includes 655 MW on ...

Croatia's solar market benefits from strong household adoption and public sector involvement, but unlocking the full potential of utility-scale projects requires overcoming ...

Croatia experienced accelerated growth in renewables over the past year, yet the sector faces critical bottlenecks. By the end of 2024, the country had reached 3.8 GW of ...

Croatia's cumulative solar capacity reached 1,099 MW at the end of June 2025, according to figures from the Renewable Energy ...

Croatia has already connected 750 MW to 800 MW of solar and wind power in 2024, and the total additions are seen reaching 1,200 MW, Ivo Milati? said

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. ...

This brings Croatia's total operational solar capacity to 872.1 MW, with more than 26,000 solar power plants in operation. Residential and industrial rooftop installations ...

Croatia has already connected 750 MW to 800 MW of solar and wind power in 2024, and the total additions are seen reaching 1,200 ...

Croatia's cumulative solar capacity reached 1,099 MW at the end of June 2025, according to figures from the Renewable Energy Sources of Croatia Association (RES ...

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader ...

Croatia has already connected 750 MW to 800 MW of solar and wind power to the grid since the beginning of the year, and the total additions in 2024 are expected to reach ...
