-----

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions ...

The Cyprus Energy Regulatory Authority (CERA) has approved the Cyprus Transmission System Operator's (TSOC) request to develop and operate large-scale energy ...

Cyprus is rapidly embracing energy storage solutions to support its renewable energy transition and ensure grid stability. This article explores the latest advancements, challenges, and ...

Cyprus will install its first large-scale energy storage system within 16 months to integrate renewables, stabilize the grid, and reduce electricity prices.

In a move set to transform the country's energy landscape, the Cyprus Energy Regulatory Authority (CERA) has greenlit the development of three state-owned battery ...

Cyprus will establish its first large-scale electricity storage infrastructure within the next 16 months, Energy Minister George Papanastasiou announced at the Green Agenda ...

An environmental impact assessment (EIA) has been submitted for a renewable energy project combining solar PV and energy storage on the Mediterranean island nation of Cyprus.

Cyprus has commissioned its first major battery energy storage system (BESS). Discover the 50 MW project's partners, technical details, and impact on grid stability and ...

In this paper, Tillyros, Komodromos, Lestas and Christofides investigate the technical and economic viability of residential PV/battery hybrids under Cyprus's unique solar irradiance and ...

Cyprus has commissioned its first major battery energy storage system (BESS). Discover the 50 MW project's partners, technical details, ...

Cyprus will establish its first large-scale electricity storage infrastructure within the next 16 months, Energy Minister George ...

In a sun-drenched Mediterranean win for clean energy, Cyprus deployed a 12MWh Island BESS Container Microgrid across three islands in 2025 (Eurelectric). This solar-storage hybrid ...
