How can I ship a plant carefully?

To ship a plant with care, use a 'handle with care' tag to let the delivery person know to handle it gently. This will help keep the plant upright during shipping and ensure its safe arrival. When shipping plants, this standard shipping label is essential.

How do you ship a potted plant?

Pack plants with slightly moist (not wet) soil, wrap roots in damp newspaper or paper towels, and seal in plastic to maintain moisture during transit. Remove plants from ceramic pots before shipping and use lightweight plastic containers to reduce shipping costs and prevent breakage.

Do you ship plants in containers?

Initially, we bare-rooted all the plants for shipment. We wrapped the roots in moist media, such as peat or sphagnum moss. We found that customer satisfaction increased once we started shipping the plants in their containers. However, shipping plants in their containers comes with challenges of its own.

How to safely ship plants?

By using appropriate packaging materials and following proper sanitation procedures, you can help prevent the spread of pests and diseases and ensure that your plants arrive at their destination healthy and safe. The first step to safely shipping plants is selecting the right container.

Using the right materials is key to shipping plants successfully. Opt for durable containers such as plastic pots or corrugated boxes, depending on the size of your plant. ...
