How many 5G base stations will China have in 2025?

China's Ministry of Industry and Information Technology (MIIT) unveiled plans to more than triple the number of 5G base stations over the next four years, targeting a total of 3.64 million by end-2025, local newspaper China Daily reported. Under this plan, China aims to have 26 5G base stations for every 10,000 people by the end of 2025.

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

How is the 5G base station market segmented?

The global 5G Base Station Market is segmented based on Frequency Band, Component Type, Station Type, End-use, and Geography. Based on the Frequency Band, the market is further segmented into less than 2.5 GHz, 2.5 - 8 GHz, 8 - 25 GHz, and more than 25 GHz.

Distribution means the passing out of something. A teacher is in charge of distribution of corrected essays. A lunch lady manages the distribution of food.
