What type of electricity does Iceland use?

Iceland's national electrical grid is owned and run by Landsnet and is composed of 3,000 km of transmission lines and approximately 70 substations. Iceland's electricity is produced almost entirely from renewable energy sources: hydroelectric(70%) and geothermal (30%).

What is the standard voltage in Iceland?

In Iceland, the standard voltage is 230V, and the frequency is 50Hz, which is typical for most European countries. If you're traveling from the US, you should be aware that the voltage in the United States is 120V with a frequency of 60Hz, which is different from Iceland's system.

Do I need a power adapter to travel to Iceland?

If you are traveling to Iceland with electronic devices from a country with a different voltage or frequency, you will need to use a power adapter and possibly a voltage converter to ensure safe and proper operation of your devices. This Universal Travel Adapter is the ultimate travel companion for anyone exploring the globe.

Does Iceland use 230 volts?

Iceland uses the same voltage as most of Europe, 230 volts. However, their electrical outlets use a different plug type than the US and Canada. Therefore, you will need a travel adapter to plug in your devices, but not a voltage converter or transformer.
