Website: <https://afasystem.info.pl>

Solid-liquid phase change materials (PCMs) have been studied for decades, with application to thermal management and energy storage due to the large latent heat with a relatively low ...

In this thesis, the incorporation of a storage system with phase change materials in a domestic water heating system was investigated. The system proposed in this work consists of a hybrid ...

Latent heat energy storage systems (LHESS) store the energy absorbed/released when a material goes through a phase transition: these materials are called phase change ...

Recent advancements in PCESMs have opened up opportunities for their extensive use in many industries, providing inventive solutions for effective energy storage, ...

Abstract: One way of storing thermal energy is through the use of latent heat energy storage systems. One such system, composed of a cylindrical container filled with paraffin wax, ...
