Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

Among the innovative solutions paving the way forward, solar energy containers stand out as a beacon of off-grid power excellence. In this comprehensive guide, we delve into ...

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best return on investment.

Our website hosts several leading solar equipment manufacturers serving the Dominican Republic solar market. Please navigate to our website's inquiry page on your web browser and send us ...

When deployed, the container slides panels out on all sides to form a large solar field, yielding 20-200 kWp of solar generation. Up to ...

A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter--all housed within a durable, weather-resistant shell. Our systems can be deployed ...

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

EcoDirect designs and supplies solar + battery projects in the Dominican Republic. Our team has the tools and experience to get your next project designed and delivered.

When deployed, the container slides panels out on all sides to form a large solar field, yielding 20-200 kWp of

solar generation. Up to 500 kWh of lithium battery storage ...

A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter--all housed within a durable, weather ...

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best ...

With 140kW solar and 215kWh battery in a 40ft container, it handles heavier industrial loads in harsh outdoor conditions, supporting sustainable operations with minimal maintenance.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.
