-----  
How much does an EV cost in Ireland?

EVs in Ireland cost EUR0.18 per kilometre to run, while diesel comes in at EUR0.27 and petrol at EUR0.30 per kilometre. That's up to 60% lower running costs for electric cars. Charging an EV costs a lot less than refueling a petrol or diesel car. A 60 kWh battery costs about EUR12 for a full charge. Filling up a traditional car? Expect EUR50-EUR100.

Where can I buy an electric car in Ireland?

If you're looking for an electric car, Energia offers a range of home charging EV offers with many of Ireland's top manufacturers, including Opel, Hyundai, Honda, Kia, and Citroën. To encourage the switch to electric vehicles, the government provides several incentives and tax credits.

Can you save money buying an electric car in Ireland?

When you buy an electric car in Ireland, Vehicle Registration Tax (VRT) relief means you can save a chunk of money right away. You can get up to EUR5,000 off in VRT relief, so if you add that to the SEAI grant, you're looking at a possible EUR10,000 saved.

Are EVs a good investment in Ireland?

Over five years, EV drivers in Ireland can save thousands in fuel and repair costs. With no oil changes, fewer moving parts, and minimal brake wear thanks to regenerative braking, EVs are built for durability. For fleet owners and commuters alike, this means higher uptime and lower total cost of ownership. 4. Will solar panels power my EV at home?

Yes -- EV's are more affordable than ever with SEAI grants, lower running costs, and growing charging networks. Plus, many new ...

When you look at electric vehicle costs in Ireland, it's clear there's more to it than just the sticker price.
