Members of the European Parliament are calling on the European Commission to propose an EU strategy on energy flexibility - an initiative backed by SolarPower Europe.

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ensure grid flexibility, especially after the Iberian ...

Members of the European Parliament are calling on the European Commission to propose an EU strategy on energy flexibility - ...

The European Commission's new EU Grids Package accelerates solar, battery storage, and hybrid projects through faster permitting, smarter grid connections, and EU-level ...

By recognising storage systems under EU funding mechanisms and grid planning processes, the EU can unlock their full potential, not only in stabilising energy supply and maximising...

The European Commission must adopt an Energy Storage Action Plan within a broader Flexibility Package, to harmonise markets, remove regulatory barriers, and ensure ...

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ...

The European Commission said it will launch a European Grid Package in the fourth quarter of 2025 to expand energy storage capacity and attract clean energy investment.

With solar energy mainstreaming across the continent, now is the time for European decisionmakers to put batteries at the centre of a flexible, electrified, energy system.

Launched in March 2025, it is the first European-level tool of its kind, providing a real-time dashboard of energy storage levels in Europe, offering energy storage data across a ...

The European Commission said it will launch a European Grid Package in the fourth quarter of 2025 to expand energy storage capacity ...

This report analyses the system benefits of coupling renewables with clean flexibility, with a focus on the opportunity for pairing solar electricity generation and battery ...

With SolarPower Europe already established as the leading advocate for solar energy in the EU and given that solar is a major driver of demand for battery storage, the ...
