Will Flatiron energy install a 300 MW battery energy storage system?

ISO New England has given the thumbs up to a project proposed by Flatiron Energy and envisaging the installation of a 300-MW/1,200-MWh battery energy storage system (BESS) in Boston, Massachusetts. Battery energy storage system. Image by: Flatiron Energy.

Who is Flatiron energy?

Boulder, Colorado-based Flatiron Energy develops and operates standalone utility-scale battery storage systems in the Northeast and Mid-Atlantic US. The company says its mission is to reduce emissions that contribute to climate change and environmental injustice. Among its clients are local communities, property owners and electricity users.

Will Flatiron energy power a greener future?

Powering a greener future starts here! Flatiron Energy has received approval from ISO New England for a 300-MW/1,200-MWh battery energy storage system in Boston, Massachusetts. The authorization includes the construction of a related 0.08-mile 115-kV transmission line.

What does Flatiron do?

Energy storage, where it's needed. Flatiron provides safe and reliable energy solutions to improve grid reliability, reduce ratepayer costs, and support communities as energy demand grows. We develop and operate utility-scale energy storage projects that strengthen the electric grid and provide clean capacity where it is needed most.

This article provides a comprehensive guide on battery storage power station (also known as energy storage power stations). These facilities play a ...
