---

The solar installation now generates 50 percent of the terminal's annual energy needs, greatly reducing emissions and improving air quality. In addition to generating power ...

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the ...

As a leading example of sustainable port operations, this project serves as a beacon, inspiring similar initiatives globally and paving the way for a cleaner, greener, and more efficient future ...

The 7.2-megawatt installation at Port Newark Container Terminal (PNCT) now generates 50% of the terminal's annual energy needs.

Technology: 7.2 MW ground- and canopy-mounted solar PV across 7.8 acres of container terminal.<sup>1</sup> Key Metrics: Supplies ~50 % of terminal's annual electricity; excess fed to grid; ...

PNCT, a joint venture between Ports America and Terminal Investment Limited (TiL), partnered with Standard Solar under a 25-year power purchase agreement for the installation of two ...

"By working hand-in-hand with PNCT and the city of Newark, our seaport is now home to a large solar energy project capable of generating significant energy for one of its ...

The solar facility is responsible for 50% of the terminal's annual electrical power, greatly reducing the demand from the Newark-area electrical grid. The system further promotes clean energy in ...
