OverviewOther designsCommon power problemsTechnologiesForm factorsApplicationsHarmonic distortionPower factorThese hybrid rotary UPS designs do not have official designations, although one name used by UTL is "double conversion on demand". This style of UPS is targeted towards high-efficiency applications while still maintaining the features and protection level offered by double conversion. A hybrid (double conversion on demand) UPS operates as an off-line/standby UPS when power conditions are within a certain preset window. This allows the UPS to achieve very high efficien...

Shopping for a generator? Read about types, features, safety, and other must-know topics in our generator buying guide to make an informed choice.
