Three Georgia-based solar companies have joined together to design, build and construct an innovative solar array atop the parking deck at Georgia Power's headquarters in ...

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.

We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations.

Specially designed for container roofs, these panels maintain airflow underneath to prevent overheating. A typical 40-foot container roof holds about 1,000 square feet of solar ...
