---

Greek utility PPC Group has officially broken ground on a hybrid solar and battery energy storage system (BESS) on the island of Astypalea, aiming to cover more than 80% of local electricity ...

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs ...

This investment marks a significant milestone for Metlen as it expands its presence in the renewable energy sector. The company's focus on solar and wind projects ...

57% of the energy mix covered by photovoltaics, wind, and hydroelectric power 2023 marked a historic milestone in Greece's clean ...

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than EUR500 million in the Greek "Operator of Electr..."

Discover how Greece is rapidly expanding its clean energy sector with significant investments in solar and wind farms to achieve ambitious sustainability goals.

German energy company RWE and Greek clean power developer PPC Renewables will build 567MWp of solar PV capacity in ...

Greece offers strong renewable energy investment opportunities in solar, wind, and storage with EU support.

57% of the energy mix covered by photovoltaics, wind, and hydroelectric power 2023 marked a historic

milestone in Greece's clean energy production, with 57% of the energy ...

Greece offers lucrative renewable energy investment opportunities in 2025 with expanding solar and wind projects supported by EU funding.

German energy company RWE and Greek clean power developer PPC Renewables will build 567MWp of solar PV capacity in northern Greece.

Greece's renewable energy sector is experiencing a rapid development. In the last five years, the share of renewables in the country's electricity mix grew by more than 15 ...

In recent years, Greece has significantly increased its renewable energy (RES) production and consumption, hitting a record high in 2023 in wind, solar and hydroelectric ...
