What is the largest battery energy storage system in Eastern Europe?

RAZLOG,Bulgaria-- (BUSINESS WIRE)--Stationary battery manufacturer Hithiumhas successfully deployed the largest battery energy storage system (BESS) project in Eastern Europe to date,with a capacity of 55MWh.

What is the largest energy storage facility in Eastern Europe?

The project,the largest in Eastern Europe,has been realised by Solarpro,a company specialising in energy generation and storage solutions across Europe. The facility became operational in early June 2024,following the installation of Hithium's 16 energy storage containers,each with a 3.44MWh capacity.

Is energy storage a good investment in Europe?

Compared to classic renewables,energy storage has really only become an investable asset in Europeover the last few years on the back of technology advances,market price signals,and government support mechanisms.

How do energy storage assets make money in Europe?

For short-duration energy storage assets,there are really three key revenue streams for energy storage assets in Europe. The first one is capacity payments,which have become a broadly implemented policy measure by governments to support system reliability and incentivize the installation of certain new power asset types.
