Will 5G be able to reach 100 Mbps in Cambodia?

By allocating blocks of 100 MHz, 5G in Cambodia could achieve peak download speeds of 20 Gbps and an average download speed of 100 Mbps, significantly improving connectivity. The MPTC has been proactive in expanding 4G infrastructure and securing key radio frequencies.

Why is Cambodia integrating 5G into the telecommunications sector?

This move is part of the country's broader strategy to enhance digital government, businesses, and citizen engagement. The Ministry of Posts and Telecommunications (MPTC) is working on integrating 5G into Cambodia's telecommunications sector, focusing on expanding bandwidth and network coverage to meet the growing demand for high-speed internet.

Does Cambodia have 5G?

A major component of 5G deployment in Cambodia is the 3.5 GHz frequency band, which is currently unused by 2G, 3G, and 4G networks. This mid-band frequency provides coverage similar to the 2.6 GHz band and contributes significantly to the expected 5G-driven GDP growth by 2030.

Will Cambodia support 5G networks in 2023?

In order to support 5G networks, the Cambodian government and mobile service providers have been upgrading the nation's telecom infrastructure. The Cambodian government has set a target of 2023 for the commercial rollout of 5G networks. In order to achieve this goal, the government has allocated 200 MHz of spectrum for 5G use.

KINGTEL has a master plan to build 3,000 base stations of 5G in Cambodia over 2 to 3 years including the first phase of 5G SA core network, transmission network and related technical ...

The Minister of Posts and Telecommunications has confirmed 5G rollout will begin in January 2026, while
