How much does a solar inverter cost?

A solar inverter costs \$1,500 to \$3,000 total on average for a medium-sized solar-panel system installation. Solar inverter prices depend on the size and whether it's a string inverter, microinverter, or hybrid model. String inverter systems cost less up front, but systems using microinverters last longer.

How do I choose a solar inverter?

Stick with a string inverter. Lower overall cost, fewer moving parts. Match the inverter to the system size, don't overspend. Choose one with at least a 10-year warranty. Ask your solar installer to quote two or three options. If you might expand your system, size the inverter accordingly.

How much does a solar generator cost?

For a DIY solar-panel system installation, consider a solar generator that typically includes an inverter, battery, and charge controller all in one user-friendly package. Portable solar generators cost \$500 to \$3,300. Which inverter is best for solar panels?

Where should a solar inverter be installed?

Depending on the type, contractors install inverters directly on the backside of the solar panel, on the side of the house, on the roof, or inside a garage. Get free estimates from solar panel installers near you. Factors that affect solar inverter costs include:
