What is the global solar PV glass market size?

The global solar PV glass market size was valued at USD 3.23 billion in 2016. The growing emphasis on the adoption of clean energy sources is likely to be the key driver for the market growth in the coming years. Clean & renewable energy is an affordable alternative to fossil fuel-based electricity.

How much does Huawei invest in R&D?

Every year, Huawei invests over 10% of its sales revenue into R&D. Our total R&D investment over the last decade now exceeds CNY1.11 trillion. In 2023, our total R&D spending reached CNY164.7 billion, representing 23.4% of our total revenue. On December 31, 2023, 114,000 employees (about 55% of our workforce) worked in R&D.

How did Huawei perform in 2024?

The company reports that its performance was in line with forecast, having generated CNY862.1 billion in revenue and CNY62.6 billion in net profits. In 2024, Huawei invested CNY179.7 billion back into R&D, which accounted for 20.8% of its annual revenue. Altogether, the company's R&D investment over the past decade amounts to CNY1.249 trillion.

Why is the US investing in solar energy plants?

The U.S. government is actively investing in solar energy plants in order to achieve a future with sustainable energy. According to the International Energy Agency (IEA), the U.S. government has passed multi-year extension of tax credits for renewable energy plants such as concentrating solar power (CSP) and PV glass stations.

The RE targets and subsidies have driven large-scale procurement of utility-scale solar PV plants, which have increased the demand for PV glass. ...
