-----  
What is a EUR416 million subsidy?

The funds are part of a EUR416 million subsidy program announced last year to alleviate grid congestion. The authorities in the Netherlands have allocated EUR100 million in subsidies to the deployment of battery storage with solar projects for next year, as the country continues to struggle with a lack of power flexibility and grid limitations.

What is a 'Bess' subsidy?

The latest subsidy allocation is part of the larger EUR416 million package announced last year for PV co-located battery energy storage system (BESS) starting next year for a period of ten years. The scheme is set to open on the 1st of January, 2025.

Why do we need a Dutch subsidy scheme?

Dutch subsidy schemes are appropriate and popular to stimulate and incentivize corresponding clean investments. However, due to challenges around cost of financing, labour market tightness, nitrogen limits, and the electricity grid, we emphasize the need for a dynamic, timely, and proactive subsidy scheme.

How much money is available for energy projects in 2022?

The budget available in 2022 was EUR 74.6 million. Depending on the project type and theme, entrepreneurs could receive between 25% and 80% of eligible costs with a maximum between 9 and 15 million per project. Subsidy scheme for Cooperative Energy Generation (SCE)

The latest subsidy allocation is part of the larger EUR416 million package announced last year for PV co-located battery energy storage system (BESS) starting next year for a ...

This subsidy scheme targets renewable energy generation projects or the implementation of CO2 reduction technologies (CO2 storage/low-CO2 production (link)). There ...
