Huawei has played a pivotal role in this sustainable endeavor by constructing the largest photovoltaic-energy storage microgrid station globally, featuring a massive 400MW solar PV ...

This mine has become the world's first to achieve large-scale vehicle-cloud-network synergy, greatly improving its production safety and setting a new standard for ...

A fleet of Huaneng Ruichi autonomous electric mining trucks have been deployed in China, supported by Huawei's Cloud Services and 5G-Advanced network. The mining ...

A fleet of 100 Huaneng Ruichi autonomous electric mining trucks, the first of its kind in the world, has officially entered operation at ...

Huawei's energy storage project enhances grid stability, facilitates the integration of renewable energy sources, optimizes energy consumption efficiency, and supports economic ...

It is the world's first open-pit mine powered by 5G-A, featuring 500 Mbps uplink and 20 ms latency, and providing solid network support for HD video backhaul and cloud ...

A fleet of 100 Huaneng Ruichi autonomous electric mining trucks, the first of its kind in the world, has officially entered operation at the Yimin open-pit mine in Inner Mongolia, ...

Equipped with Huawei's cutting-edge autonomous driving system, these trucks are set to boost efficiency by 20% at the Yimin coal mine. Embracing other tech marvels like 5G-A, ...

Mined coal is crucial for numerous countries, playing a key role in their social and economic growth. To boost
