Does San Diego have solar panels?

The intense California sun is a boon to those with solar panels, as that bright sunshine spells more affordable power. San Diego currently has more solar rooftops than any other city in California, and with an average of 266 days of sunshine per year, that translates into a great deal of power collected by those panels.

Does San Diego have a rooftop solar system?

Those savings have spurred tremendous growth in rooftop solar installations in San Diego. New residential systems decreased by 36 percent between 2016 and 2017, according to the Center for Sustainable Energy. However, with new legislation requiring new homes to include solar, those numbers will likely increase.

Can I add solar energy to my San Diego property?

For a list of San Diego area PACE financiers, go to the Center for Sustainable Energy financing search map. The assessed value of your property cannot be increased based on the addition of a solar energy system per state law. But be aware that swimming pool and hot tub heaters are exempt from this law.

Is San Diego a solar city?

Environment California's report has ranked San Diego as one of the top solar cities in the country for three consecutive reports and that's very encouraging." Researchers with the Environment California Research & Policy Center said San Diego now has enough solar energy to power 47,000 homes.
