What is a datasafe HX Battery Cabinet?

The HX battery cabinet offering now makes the DataSafe HX battery the ideal choice to optimize your UPS system installation, while offering flexibility in allowing customized options enabling you to design the perfect system for your particular application. DataSafe HX battery cabinet systems are factory pre-wired to minimize installation time.

Do I need an Intercell connector for a HX Battery Cabinet?

For cabinet installations, reference DataSafe HX Battery Cabinet Systems Range Summary (AM-DSCAB-RS). If provided, intercell connector covers should be installed after completing the intercell connections. Attention: Unless otherwise noted, battery racks and cabinets should not be transported with rigid intercell connectors in place.

What is a battery cabinet?

A battery cabinet houses and protects the batteries that supply stored energy to a UPS system. It ensures that backup power is readily available whenever primary power is interrupted. Battery cabinets can be installed indoors or outdoors and are designed to provide secure, organized, and scalable energy storage for continuous power delivery.

How do I store datasafe HX batteries?

Store DataSafe HX batteries in a dry, clean and preferably cool location. Since the batteries are supplied charged, storage time is limited. In order to easily charge the batteries after prolonged storage, it is advised not to store it more than: 6 months at ambient temperature no warmer than 77°F (25°C)
